

SeatsController

Get Mapping (/seats – gets all seats)

LoyaltyProgramController

Get Mapping (/loyalty-programs – gets all loyalty programs)

FlightProviderController

Get Mapping (/flight-providers – gets all flight providers)

FlightController

Get Mapping (/fliights – gets all flights)

Get Mapping

(/fliights/{originCountry}/{destinationCountry} – gets flights from origin to destination)

Get Mapping (/flight{id} – gets flight with id)

Get Mapping (/fliights/{flightId}/{bookings} – gets bookings from flight id)

Get Mapping (/fliights/{flightId}/airplane – gets airplane of flight id)

Get Mapping

(/flight/{flightId}/seats-availability – gets available seats of flight id)

Get Mapping

(/ flight/{flightId}/check-seat-availability/{seatId} – checks for availability of seat on flight)

Get Mapping (/flight-changes – gets all flights changes)

FlightCancellationController

Get Mapping (/cancel/flight/{flightId} – cancels flight with flight id)

Get Mapping (/flight-cancellations – gets all flight cancelations)

DeleteController

RequestMapping("/delete")

Delete Mapping (/flight/{id} – deletes flight with flight id)

Delete Mapping (/booking/{id} – deletes flight with booking id)

CreateController

RequestMapping("/create")

Post Mapping (/loyalty-program – creates loyalty program)

Post Mapping (/country – creates country)

Post Mapping (/flight-provider – creates flight provider)

Post Mapping (/airplane-model – creates airplane model)

Post Mapping (/airplane-type – creates airplane type)

Post Mapping (/{intNumberOfSeats}/seats – creates NumberOfSeats seats for airplane)

Post Mapping (/airport – creates airport)

Post Mapping (/airplane – creates airplane)

Post Mapping (/flight – creates flight)

Post Mapping (/booking – creates booking)

CountryController

Get Mapping (/countries – gets all countries)

ChangesController

RequestMapping("/change")

Put Mapping(/flight – changes flight)

BookingController

Get Mapping (/book – gets all bookings)

AiportController

Get Mapping (/airports – gets all airports)

Get Mapping (/airports{countryName} – gets all airports from country)

AirplaneTypesController

Get Mapping (/airplane-types – gets all airplane types)

AirplaneModelController

Get Mapping (/airplane-models – gets all airplane models)

AirplaneController

Get Mapping (/airplanes – gets all airplanes)

Get Mapping (/airplanes/{airplaneId} – gets airplane with airplaneId)
